

I have been listening to XM radio for about a month. I love it! I live in a city dominated by Clear Channel and have become tired of the repetition, poor quality DJ's who seem to be obsessed with sex talk, aggravating commercials, and a play list shorter than my own music collection. For years I was thankful for my CD player! Now I have satellite radio. Please deny Nabs petition 04-160 and tell them that capitalism is about competition, and if they want to keep their market share they had better change the way they do business. There is nothing wrong with radio that cannot be fixed. Just think if our government had banned Japanese cars, we would all still be driving the equivalent of a '72 Ford LTD. Tell Clear Channel and other big radio station corporations to GET BETTER and stop running to you every time there is new competition.

Brian
